*Secretary in Head at the Administrative Center,
Institute of Environmental Rehabilitation and
Conservation, Japan*

April 2021 - March 2025

*Secretary in Head at the Extension Center,
Institute of Environmental Rehabilitation and
Conservation, Japan*

April 2025 - Present

*Expert, Institute of Environmental Rehabilitation and
Conservation, Japan*

Specializations

- *Community-based Reforestation*
- *Education for Sustainable Development*
- *Natural Resource Management*
- *Participatory Extension Approaches*
- *Monitoring, Evaluation and Learning, etc.*

Current Projects

Focusing on promoting the environmental education through the development of a sustainable system for conservation, rehabilitation and utilization of forest resources through natural resource utilization, community-based agroforestry, and forest-related

cultural practices, in collaboration with national and local governments, private company, and research institute in Cambodia. The current project aims to support its sustainability by diversifying income sources through the commercialization of products generated from its activities, such as bio-briquettes, tree seedlings, and non-timber forest products (NTFPs). Participatory extension approaches as well as Monitoring and Evaluation methods are applied throughout the project, enhancing the stakeholder engagement for long-term sustainability.
